Pigtailed Analog FP-LD
TBSxxxx Series

■ 1310/1550nm InGaAsP LD
■ Fabry-Perot Laser Diode
■ SMQW(Strained Multi-Quantum Well) Structure
■ SMF Pigtailed, SC or FC Connector
■ Analog application

Family Model

TBSx104 TBSx204 TBSx304 / TBFx104 TBFx204 TBFx304

Features

- 1.31μm/1.5μm InGaAsP SMQW Fabry-Perot laser diode
- Low threshold, high slope efficiency and high output power LD
- Cost-effective uncooled laser diode
- Wide Operating temperature ; -40℃ to +85℃
- Tested by TERADIAN's Reliability and Qualification Program

Description

The TBSxxx4 pigtailed coaxial LD module consists of an uncooled, reliable strained MQW InGaAsP laser(FP) and a back-facet InGaAs PIN photodiode. The parts of pigtailed LD module – single-mode fiber, lens and laser diode - are actively aligned by high power YAG laser welding method. This packaging guarantees high coupling efficiency, high slope efficiency, low operating current and low tracking error over a wide temperature range (-40℃ to +85℃).

Applications

- Wireless fiber-optic repeaters
- Analog and digital modulation systems
- Video link

1. Modulation bandwidth was measured with impedance matched to 50Ω and TO-Can lead 2.0mm-long left after being cut off

! Handling Caution

The LD module can be damaged by overvoltage and current surges. Precautions should be taken for transient power supply.

This device is susceptible to damage as a result of electrostatic discharge(ESD). Take proper precautions during both handling and testing

The stress to the fiber pigtail may cause the damage on the performance. The fiber pigtail may snap off by dropping the module.

Laser Eye Safety

These LD modules have laser semiconductor product and are classified as AEL Class IIIb per U.S. FDA/CDRH 21CFR 1040 and class 3a per EN60825-1. These products comply with 21CFR, Chapter 1, Subchapter J(21CFR 1040.10 and 1040.11 laser safety requirements).

Laser Data

Wavelength : nm(Model :) / nm(Model :)

Measured Output power : mW(1310nm) / mW(1550nm)

Limited Power : mW(1310nm) / nW(1550nm)

Caution

On operation, If optical connectors are unterminated, modules can emit invisible laser radiation. Radiation emitted by laser devices can be dangerous to the eyes. Avoided eye or skin exposure to direct or scattered radiation
