### Description

The TD8x3xx series transceivers are designed to operate at 1.25Gbps continuous mode. The transceivers are designed to used in a single power supply(+3.3V) and an operating temperature range of 0 $^{\circ}$ C to +70 $^{\circ}$ C or -40 $^{\circ}$ C to +85 $^{\circ}$ C. The transceivers are manufactured in 2X12 pin package with Pigtailed SC/APC connector interface and made of metallized housing to obtain excellent EMI shielding. Transmitter incorporates an APC(Automatic Power Control) to maintain the output power and extinction ratio over a case temperature variation. Included in the module function is a transmitter Disable, Failure alarm and input/output power monitoring.

### Applications

- Intra-office and Inter-office
- Digital Repeater
- High-speed data links
- Video link
