

Bi-Directional WDM Module

TMx6xxx Series

- Tx1.31 μ m/Rx1.55 μ m
Bi-Directional module with SMF
- SMF pigtail with SC/FC/ST connector
- High speed upto 2.5Gbps

Features

- Integrated Laser diode and photodiode using two WDM edge filters
- 1.31 μ m uncooled InGaAsP SMQW Fabry-Perot(FP) or Distributed Feedback(DFB) Laser Diode
- High sensitive InGaAs PIN-TIA
- SMF pigtail with SC/FC/ST connector
- Operating temperature ; 0 to +70 $^{\circ}$ C/-40 to +85 $^{\circ}$ C
- Tested by Teradian's Reliability and Qualification Program

Description

The TMx6xxx series products are designed to meet the specifications of SONET and ITU-T SDH. The pigtailed WDM Bi-Directional module has an optional connector such as SC, FC or ST. The transmitter consists of a long wavelength 1.3 μ m InGaAsP SMQW laser diode (FP-LD or DFB-LD) and the receiver includes a planar InGaAs PIN photodiode with low dark current, capacitance and noise. The modules are designed to used in an operating temperature range of 0 $^{\circ}$ C to +70 $^{\circ}$ C or -40 $^{\circ}$ C to +85 $^{\circ}$ C.

Applications

Used in telecommunication and data communication systems, from medium to high speed for intra-office, short-haul and long-haul applications.

- Fiber in the loop(FTTO, FTTC, FTTH, PON)
- Subscriber loops
- High-speed data links, Single-mode FDDI
- Private optical networks
- Data link, Video link and Media converter

Absolute Maximum Ratings
